WHERE IT GOES
This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Block 140 long, 44 wide, bore 20 along the bottom, top shaped to the stabiliser's lower skin.
A slot in the top takes the fin root through the stabiliser's centre.
Split clamp under the bore with one M4 bolt; stabiliser and fin bond to it with epoxy.
Square the stabiliser to the wing by eye from behind before the epoxy sets.
