WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

- Lofted from the 140 x 150 fuselage face to a 60 round motor face, 55 long.
- Print nose down with the motor face on the bed; no supports needed.
- Four M3 heat-set inserts in the motor face on the bolt circle of the motor bought.
- Four M4 bolts and epoxy hold it to the firewall; the thrust line is the fuselage centre line.
- Leave a 15 mm hole through the motor face for cooling air and the motor wires.

Kitewright Range: nose cone and cruise motor mount making sketch
