WHERE IT GOES
This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

- Block 94 long, 50 wide, 50 high with a 20 bore along its length.
- Glue to the rear wall and floor so the bore lines up with the rear wall hole.
- Saw a 2 mm slit along the top of the bore and fit one M4 x 30 clamp bolt across it.
- The tail boom slides in until it meets the rear wall's inside face plus 6.
