WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut to 1,092 with a fine abrasive disc; seal the ends with thin epoxy.

Mark the motor centres 1,012 apart, 40 from each end.

Mark the pylon centre half way between the motors; this is the balance point.

Drill a 6 hole on the underside 150 inboard of each motor for the motor wires.

Wrap the clamp areas with one turn of glass tape to spread the clamp load.

Kitewright Range: lift boom (make 2) making sketch
